Thanks for the advice. I appreciate it. We can certainly do these things.

Cynthia: Carol let me know that you are thinking of using consultants for your FY00 runway rehabilitation project. I encourage you to start the process this month (July) with advertising for a consultant - this will allow you time to get them on board and done with design in time to go out to bid in February (maximizing chances for excellent bid prices). As you know, the project includes rehabilitation of Runway 13L-31R, including overlay, grooving, installation of REILs, and installation of Distance-To-Go signs.

I'd be happy to help with any questions you may have in going through this process. Please fax/e-mail me a copy of your advertisement for my files. (I get calls from the consultants, so it's nice to know what's on the street )  
Karen
